The rates are based on all treated water and sewer systems combined within the Utility Division in order to maintain adequate bond coverage ratios. The rates are designed to provide the revenues needed to recover the cost of operating and pay the debt service, and are from the 2022 Utility Division Rate Study.

OTHER RATES

Raw, Wholesale, and Transient water rates, and commercial and industrial sewer rates are designed to provide the revenues needed to recover the costs of acquiring water rights, and ongoing participation in the operation and maintenance of reservoirs, well fields, sewer plants, or other related infrastructure.

These rates are negotiated individually on a contractual basis as permitted by the General Manager.

COMMERCIAL METER EQUIVALENCY TABLE

The Red River Authority of Texas (the Authority) assesses a base availability charge on all accounts. The availability charge is calculated using the AWWA factor based table (Table 1), with the equivalency of the Authority’s commercial ¾” meter. The ¾ Factor will multiplied by the base monthly account charge of \$114.50 to arrive at the equivalent monthly charge for that size meter.
